

WOW5 Description:

Wrap O-round Weave 5, or WOW5, is a 5 band puzzle ring where the weave is wrapped all the way around the circumference of the ring. The item in the exchange bag was printed in Polyimide by i.Materialise. I can also obtain this ring printed in brass or silver using the Interlocking Metal pilot at Shapeways. As this is still a pilot, this option is only available to the designer, so I cannot yet make the metal versions available in my Shapeways shop. Contact me directly if you are interested in a metal copy of WOW5. All ring sizes are available. The story detailing how WOW5 was designed, and why it is the first puzzle ring to wrap the weave around the entire circumference of the ring, will be published in *Game & Puzzle Design* Vol. 2, no. 1, 2016.
