

12 FLOWER PUZZLE

Divide the garden into four identical sections, with three different types of flowers in each.

52masterpieces.com

The puzzle consists of a 6x6 grid of green squares. Twelve flowers are placed on the grid: two blue flowers, two red flowers, and eight yellow flowers. The blue flowers are at (1,1) and (2,3). The red flowers are at (1,6) and (2,4). The yellow flowers are at (3,2), (3,3), (4,1), (4,2), (4,4), (5,1), (5,2), and (5,4). Coordinates are given as (row, column) starting from the top-left.

(A copy of this card has also been mailed to Scott)
