HOW TO PLAY THE G4G12 BADGE PUZZLE

Press PLAY to start next puzzle or resume current puzzle.
Press PAUSE to pause current puzzle.
To resume, press PLAY again.

When you press PLAY, two or three pentomino shapes will light up. Your challenge is to figure out how many differently bilaterally symmetrical shapes can be made by putting all those pieces together. Answer the puzzle by pressing the correct number: 0, 1, 2, 3 or 4, then pressing ENTER.

For instance, the two pieces above make the two bilaterally symmetrical shapes below:

so the answer for those two pieces is 2.
Pieces must connect solidly, but not overlap.

If you are correct, a letter of GARDNER will light up. When all 7 letters light up, you win!
Go find Ryan and have him check off this puzzle on your contest card.
